

N2KBuilder™

NMEA 2000® Network Design Software

N2KBuilder™ software is a powerful, free PC-based tool for designing and verifying the integrity of NMEA 2000® networks. The N2KBuilder™ software, when installed on a Windows PC and used as part of an integrated design workflow can be used to plan, document, and validate the design of complex NMEA 2000® networks. In addition, N2KBuilder™ will directly produce a Bill of Materials (BOM) for Maretron products, eliminating guesswork and transcription errors.

Maretron®
Vessel Monitoring & Control Systems

N2KAnalyzer® is a software tool, currently offered free of charge with the purchase of a USB100 NMEA 2000®/USB gateway, which gives you a detailed view of all of the devices on a NMEA 2000® network, and lets you perform an enormous variety of configuration and troubleshooting tasks. All you need is a PC running Windows and a Maretron USB100 NMEA 2000® gateway.
